

THE THIRD DAY FELLOWSHIP OF THE COMMONWEALTH OF ISRAEL COVID VACCINE EXEMPTION

To Whom It May Concern:

The THIRD DAY FELLOWSHIP holds that it is implicitly and expressly against our beliefs to use the methods of so-called fetal therapy, in which the human fetus in various stages of its development is aborted and used in attempts to treat various diseases and to "rejuvenate" an organism. The Third Day Fellowship cannot find any justification for it even if someone may possibly benefit from the destruction of a conceived human life. Contributing inevitably to ever wider spread and commercialization of abortion, this practice (even if it's still hypothetical, effectiveness could be proved scientifically) presents an example of glaring immorality and is criminal.

This document defines, as indicated by the name, appropriate Christian living in as many aspects of society as is enumerated, therefore it would be a violation of our faith to receive the following coronavirus vaccines:

A. Pfizer and BioNTech – The Pfizer Vaccine was protein tested using the abortion-derived cell line HEK-293. This information is enumerated by the Lozier Institute [1]. This information is recorded by the Cold Spring Harbor Laboratory [2].

B. Moderna – The Moderna Vaccine was protein tested using the abortion-derived cell line HEK-293. This information is enumerated by the Lozier Institute [1]. This information is cited by the vaccine researchers Kizzmekia S. Corbett, Darin K. Edwards, and Sarah R. Leist [3].

C. Johnson & Johnson – The J&J Vaccine has publicly admitted to using a cell line called PER.C6. This is published on the Janssen website [4]. This information is enumerated by the Lozier Institute [1].

D. Sputnik V – The Sputnik V Vaccine cites their manufacturers as using the abortion-derived cell line HEK-293 [5][6].

E. AstraZeneca – AstraZeneca was developed using the abortion-derived cell line HEK-293. This information is enumerated by the Lozier Institute [1]. This information is also contained in documents permitting its emergency use in the United Kingdom [7].

F. Vaxart – Vaxart was produced with the abortion-derived cell line HEK-293. This information is enumerated by the Lozier Institute [1]. This information is recorded by the Cold Spring Harbor Laboratory [8].

G. Altimmune – The Altimmune vaccine was produced and developed with the abortion-derived cell line PER.C6. This information is recorded by Altimmune's own Clinical Trial Protocol [9]. This information is enumerated by the Lozier Institute [1].

H. COVAXX and United Biomedical – COVAXX was protein tested using the abortion-derived cell line HEK-293. This information is enumerated by the Lozier Institute [1]. This information is recorded by the Cold Spring Harbor Laboratory [10].

I. Medicago – The Medicago Vaccine was protein tested using the abortion-derived cell line HEK-293. This information is enumerated by the Lozier Institute [1]. This information is recorded by the Cold Spring Harbor Laboratory [11].

J. Novavax – The Novavax Vaccine was protein tested using the abortion-derived cell line HEK-293. This information is enumerated by the Lozier Institute [1]. This information is recorded by research at ScienceMag [12].

K. University of Pittsburgh “PittCoVacc” – PittCoVacc was produced with the abortion-derived cell line HEK-293. This information is enumerated by the Lozier Institute [1]. This information is recorded by EBioMedicine at the Lancet [13].

L. Walter Reed Army Institute – The Walter Reed Vaccine was produced with the abortion-derived cell line HEK-293. This information is enumerated by the Lozier Institute [1]. This information is recorded by the Cold Spring Harbor Laboratory [14].

M. Sanofi Pasteur and Translate Bio – The Sanofi Vaccine was developed and protein tested using the abortion-derived cell line HEK-293. This information is enumerated by the Lozier Institute [1]. This information is recorded by the vaccine researchers at NPJ Vaccines [16].

N. Inovio Pharmaceuticals – The Inovio Vaccine was protein tested using the abortion-derived cell line HEK-293. This information is enumerated by the Lozier Institute [1]. This information is recorded by research at ScienceMag [16].

O. Arcturus Therapeutics – The Arcturus Vaccine was protein tested using the abortion-derived cell line HEK-293. This information is enumerated by the Lozier Institute [1]. This information is recorded by the Cold Spring Harbor Laboratory [17].

P. Imperial College London – The Imperial College Vaccine was developed and protein tested using the abortion derived cell line HEK-293. This information is enumerated by the Lozier Institute []. This information is recorded by the Cold Spring Harbor Laboratory [18].

Q. Providence Therapeutics – The Providence Vaccine was developed and protein tested using the abortion-derived cell line HEK-293. This information is enumerated by the Lozier Institute [1]. This information is recorded by the Cold Spring Harbor Laboratory [19].

R. CoronaVac – CoronoVac was protein tested using the abortion-derived cell line HEK-293. This information is enumerated by the Lozier Institute [1]. This information is recorded by research at ScienceMag [20].

S. CanSino Biologics – The CanSino Vaccine was protein tested using the abortion-derived cell line HEK-293. This information is enumerated by the Lozier Institute [1]. This information is recorded by research at BioSpace [21].

T. ImmunityBio and NantKwest – The ImmunityBio Vaccine was developed, produced, and protein tested using the abortion-derived cell line HEK-293. This information is enumerated by the Lozier Institute [1]. This information is recorded by the Cold Spring Harbor Laboratory [22].

U. Institut Pasteur and Themis and Merck – The Institut Pasteur Vaccine was developed and protein tested using the abortion-derived cell line HEK-293. This information is enumerated by the Lozier Institute [1]. This information is recorded by the Proceedings of the National Academy of Sciences of the United States of America [23].

V. Rega Institute, KU Leuven – The Rega Vaccine protein tested using the abortion-derived cell line HEK-293. This information is enumerated by the Lozier Institute [1]. This information is recorded by the Global Virus Network [24].

W. Anhui Zhifei – The Anhui Zhifei Vaccine was developed and protein tested using the abortion-derived cell line HEK293. This information is enumerated by the Lozier Institute [1]. This information is recorded by the Cell Press Journal [225].

X. Clover Biopharmaceuticals – The Clover Vaccine was protein tested using the abortion-derived cell line HEK293. This information is enumerated by the Lozier Institute [1]. This information is recorded by the Cold Spring Harbor Laboratory [26].

We believe a potential donor should be fully informed about possible consequences and we condemn the harvesting of biological material from a subject without their total informed consent. This condemns the usage of any vaccines manufactured utilizing stolen organs, thereby also condemning the CureVac Vaccine because it was protein tested on HeLa cells, which were harvested from an African American mother of five in 1951 without her knowledge or consent. This information is enumerated by the Lozier Institute [1]. This information is accounted by John Hopkin's Magazine [27].

We condemn all medical work profiting from the harvesting of cells from an embryo, or, in fact, any medical work profiting from the harvesting of cells from a non-consenting individual. This statement alone condemns all the above-mentioned vaccines on the basis that they come from either an aborted fetus or a non-consenting individual; in the vast majority of cases, these vaccines are condemned by both qualifications.

We are of the opinion that receiving the vaccines mentioned above would be participating in the sin of abortion, thereby resulting in our spiritual death. While neither death is desirable, we have declared that spiritual death is magnitudes less desirable than physical death because spiritual death results in the eternal suffering of our souls, as is declared in Revelation 21:8 – “But the fearful, and unbelieving, and the abominable, and murderers, and whoremongers, and sorcerers, and idolaters, and all liars, shall have their part in the lake which burn with fire and brimstone: which is the second death.” And, again in Revelation 20:14 – “And death and hell were cast into

the lake of fire. This is the second death.” On this basis, most of the abovementioned vaccines are condemned because of their usage of HEK-293 and PER.C6 in the development or testing of their vaccines.

Furthermore, below is a list of additional facts that support the refusal to receive the COVID VACCINE.

1. The Low Mortality Rate of the Disease

The particularly low mortality rate of the disease, but also its distribution by age, clearly denote that vaccination, whenever it becomes feasible, must be targeted. This percentage is fictitiously over-evaluated for the time being (~2.5%) : on the one hand, due to the over-representation of severely positive cases of the virus [1], and on the other, given that the death toll from COVID has also included the deaths of cases found positive for COVID but with other, underlying diseases (not the SARS respiratory syndrome). The Center for Disease Control (CDC) admits this, saying only 5% of deaths involving COVID-19 had COVID as the exclusive cause of death [2]. Recent studies which have estimated the number of deaths in relation to the actual number of people exposed to the virus – based on serological tests (antibody tests) in a specific geographical area – have determined that this percentage is of the order of magnitude of seasonal flu (certainly <1%) [3] The fact of the matter is that COVID has a 99.74% survivability rate, so saith the CDC [20].

2. COVID Mainly Affects People in the Third and Fourth Age Groups

COVID mainly affects people in the third and fourth age groups, where the phenomenon of immune senescence [4] occurs – that is, the reduction in size, quality and duration of their

immune response-protection - which can occur, after being vaccinated. In other words, the vaccine-induced active immunity may not be capable of protecting the elderly, who are the par excellence “target” of the corona virus; hence, the finding of an anti-viral therapy should be a priority – assuming that the protection of the elderly is in fact what is desired. The youth are affected very marginally, almost not at all.

3. Asymptomatic Transmissions of COVID are too Insignificant to Warrant the Mandate of a Vaccine

Researchers at Nature Communications [5] and the Journal of the American Medical Association [6] both found that asymptomatic transmissions of Coronavirus are less than one percent. In the case of JAMA, 0.7% of transmissions were among households, which would undoubtedly be lower in the general population or, hypothetically, a short time in a workplace where we are already spread apart, or an even shorter time in close proximity due to the infrequency or nature of such gatherings. The vaccine’s main purpose is to prevent the spread of the disease to others, but that is already incredibly unlikely, not only due to natural herd immunity, but also because, at this point in time, most people who have desired the vaccine have received it, making any mandate of it among those who do not want it frivolous.

4. Among the Seriously Ill, the Vaccine May Actually Cause More Harm Than Good

With seriously ill patients, acute respiratory failure occurs through an immuno-pathological mechanism (a “storm” producing inflammatory cytokines and reducing CD4 and CD8 T-mediated immune response [7]). There are serious concerns that vaccination will exacerbate this immune complication in the event of a subsequent viral infection and will consequently worsen the patient's clinical course. A similar effect was observed with the FeCoV coronavirus vaccine, which affects cats and causes peritonitis. [8]. Furthermore, because the vaccine manufacturers are exempt from liability for any damages due to injuries, we expressly oppose this.

5. In the 12-29 Age Group, there has been a notable risk of heart inflammation due to the COVID Vaccine [9]

The CDC reports that there have been many reports of myocarditis and pericarditis following the reception in mRNA vaccine recipients. These are inflammation of certain heart muscles, the myocardium and the pericardium respectively. The vaccine has caused multitudes of people who are not allergic to any product in them to suffer heart inflammation. Many have even died. Therefore, the COVID Vaccine is not only a spiritual threat, as indicated in the prior documents, but also a physical threat. It seems to us very impractical, inconsiderate, and even abusive to mandate a vaccine that has such a high rate of physical harm to a recipient.

6. The Vaccine is Temporary and Will Go Obsolete, Will You Mandate Future Developed Vaccines for Future mutations of COVID

The logic of eradicating an infectious disease through global vaccination, on the one hand presupposes the existence of a very safe and very effective vaccine, and on the other hand, most importantly that there be no other hosts of the virus in the natural environment. That is, man has

to be the only species that can host the virus. This is true of the polio virus, but it does not apply to the coronavirus.. Unknown and controversial remains the intermediate link (host?) which has not at this time been isolated. In any case, the disappearance of the virus through global vaccination would only be temporary - in other words, a terrible waste of resources, inasmuch as it could transfer from its natural refuge (the intermediate host) to the human population at any given moment, capably mutated for bypassing the existing herd immunity and initiating a new pandemic.

Coronaviruses, being RNA viruses, mutate rapidly, gaining genetic and therefore antigenic diversity. This diversity, especially for coronae, also increases through RNA recombination, due to the particularly inconsistent mode of transcription of viral RNAs. Two types have already been identified for SARS-Cov2, S and L [10][11]. It is doubtful that a vaccine can provide both equal coverage for all strains of the virus that emerge, as well as permanent protection over time, hence underlining one more time the importance and priority of finding anti-viral drugs against coronavirus. It is quite likely, therefore, that over time, a global vaccination devolve into regular global vaccinations.

7. Multiple, Eminent Health Authorities From All Across the World Have Warned Against the Safety and Efficacy of Coronavirus Vaccines

Dr. Peter Hotez [12], UK scientist Hilda Bastian [13], and former Vice President of vaccine-manufacturer, Pfizer, Dr. Michael Yeadon [14] have all warned against the safety of the COVID Vaccines due to the nature of their creation.

Vaccine development usually takes many years or decades, whereas the coronavirus vaccine has been manufactured in less than 12 months. We are not comfortable with receiving a "fast-tracked" product, as by definition, fast-tracking a product means there is no data on long-term safety.

8. Current Pfizer CEO Unable to Say if Vaccine Will Mitigate COVID Transmission [15]

Albert Bourla, CEO of Pfizer, was unable to confirm if any of effectiveness of the COVID Vaccine. It is evident from the above that the vaccine has a negligible effectiveness and a great chance of harm caused to a recipient of the Vaccine. The Vaccine certainly has greater risks than it does benefits.

9. Adverse Reactions and Death Caused by the Vaccines are Underreported

According to a study done by Harvard [16], at the commission of the United States Government, less than 1% of all adverse reactions to vaccines are actually submitted to the National Vaccine Adverse Events Reports System (VAERS). These problems have yet to be fixed.

It is unpredictable what negative effects will be suffered from the reception of the vaccine, therefore we find that it would be inappropriate to mandate the vaccine and, in fact, harmful.

Much of this has been derived from arguments presented by Monk Paul of the Holy Mountain, Biologist, MD Molecular Biology and Biomedicine [17], Christian Elliot's article listing many reasons why to be skeptical of the Vaccine [18], and an anonymous hospital worker's letter requesting an exemption from the Vaccine [19].

We believe that this is sufficient evidence to conclude that it would not be in the best interest for the members of our community to receive the COVID Vaccine.

The following is a list of sources demonstrating the safety issues with the vaccine.

- 1: That COVID Deaths are over-evaluated due to false positive tests for the virus – <https://www.bmj.com/content/368/bmj.m1113.long>
- 2: That only 5% of Deaths had COVID as the only cause - https://www.cdc.gov/nchs/nvss/vsrr/covid_weekly/index.htm
